#### Step1: work the wire wrapped pendant

2. Wrap the top of bead for an exquisite bail (For details about the technique, please head over to our post "how to cover a briolette" under category wire wrap technique).

3. Take the remaining wire tails and string on the prepared 4mm crystal beads;

4. For that section reaches to a certain length, wrap the beaded portion around the top of bead upwards.

5. Keep wrapping the leftover blank wire around the neck, when the beads are fastened tautly, remove the excess part as close as possible to the neck.

**Step2: add on the chain and clasp**

Snip a proper length off the chain coil. Thread the pendant on and then complement the circle by adding the clasp and one jumping on two ends.

Then, this is one of the pair!

### Step3: make another piece

Replace the birthstone and repeat all steps of the above for a complete pair of mother and daughter necklaces.
