Fold 4**

Fold 3

* After making Fold 3, open Fold 2 and
  reverse the direction of Fold 3 on
  the left side so that both "tabs" are
  pointing upward. Close Fold 2 again
  and carefully slip the left tab inside
  Fold 4 so they both are still creased
  in the same place and create a single
  edge.
** Cut along the dotted portion of Fold 4
  to allow the tab it creates to easily
  slip behind the disc.
