

Reactor cage parts  
1/8" black acrylic

Capture ring + fake inductor parts  
3/8" clear acrylic

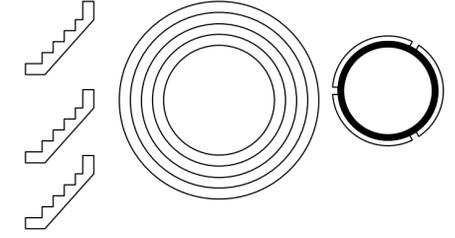

Perforated metal ring part  
1/16" clear acrylic

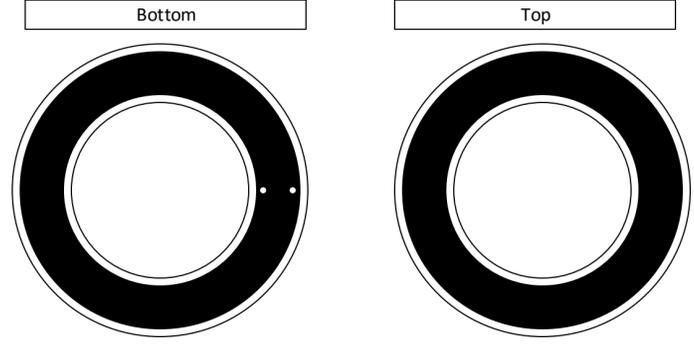

Note: Cuts are color-coded to control the order that the laser cuts them. Spacing them out helps reduce warping. If you're not using color mapping, use the all black shape.

Stacked rings parts  
1/16" clear acrylic

Note: For the smaller ring, etching before cutting (rather than the other way around) can help prevent warping.

Reactor ring case parts  
1/16" clear acrylic

Reactor ring case parts  
1/8" clear acrylic
