

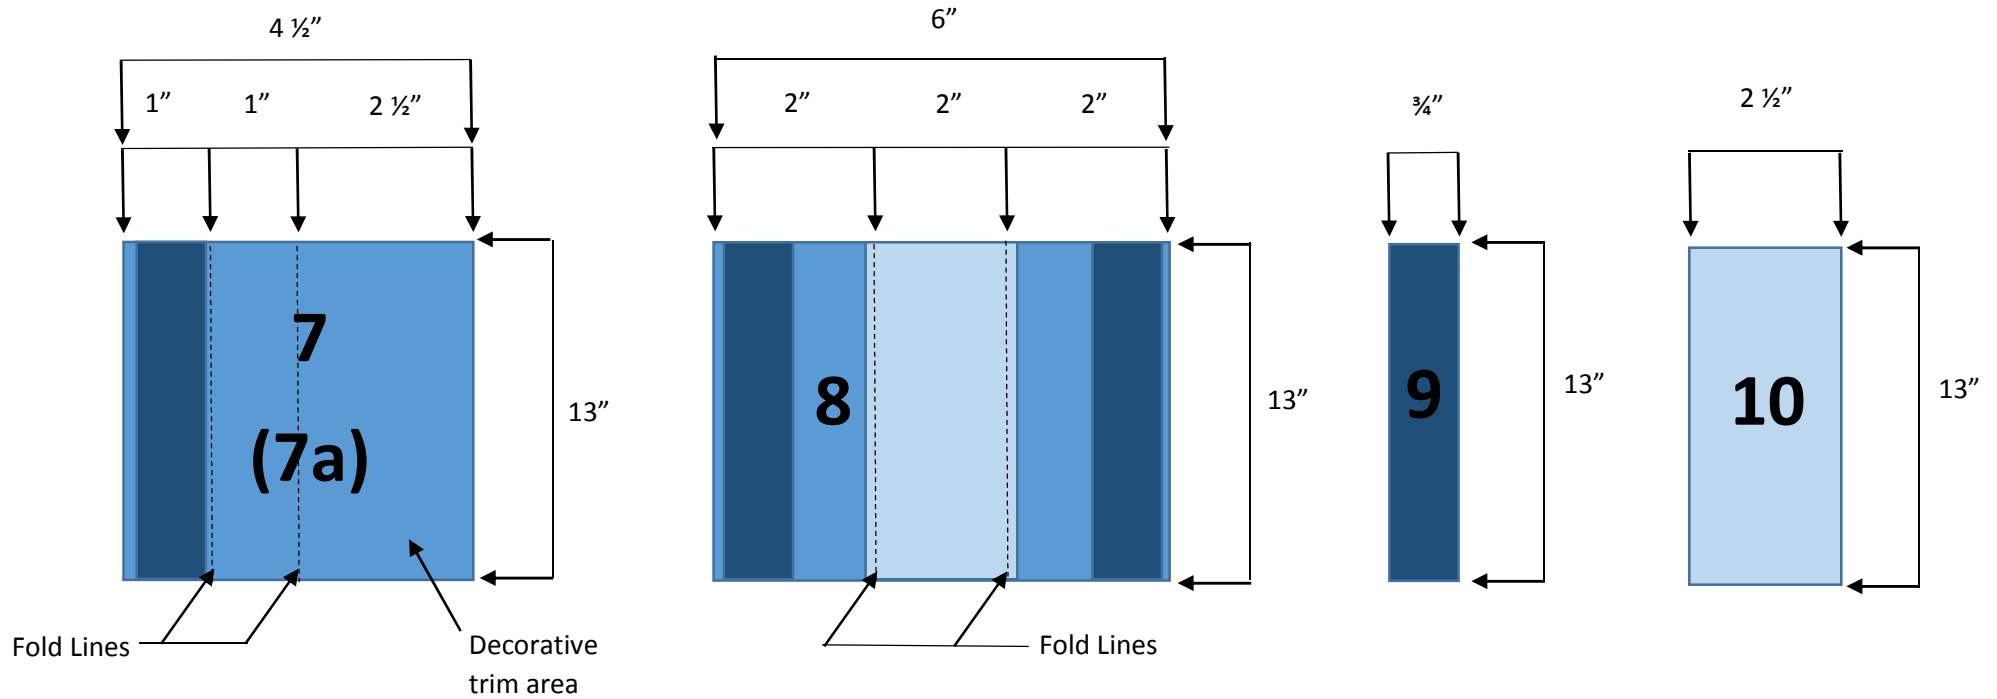

Diagram 5 : Construction Dimensions for Postbound Spine (all parts shown “exploded” as if laid out flat; flesh side up)

Legend and Notes

7 = Spine Leg	Note: Attaches to front of A at E as the Decorative Trim; constructed from brown leather liner; layout position for spine leg foundations 9 (for 7) and 9a (for 7a) shown in dark blue. Dimensions are set longer than necessary to provide plenty of flexibility to the completed postbound spine.
7a = Spine Leg	Note: Same as 7 but attaches to front of B at opposite edge to closure end flap.
8 = Spine Body	Note: Attaches (from both ends) to spine legs 7 and 7a with 3 binding posts; constructed of brown leather liner; shows layout position for spine leg foundations 9b and 9c. Dimensions are set longer than necessary to provide plenty of flexibility to the completed postbound spine.
9-9c = Spine Legs Foundation	Note: Constructed from bag stiffener; 3 punched holes for binding posts are made on all four spine legs during Part III of instructable.
10 = Spine Body Coverup	Note: Layout shown in lightest blue on 8. It is attached grain side up to flesh side of 8. The extra 1/2" will be overlap during construction and accommodate folds.
11 = Binding Post Screws (x3)	Note: Not shown on diagram; 1 1/4" in length.
