WARNING:

CHOKING HAZARD - Small parts.
Not for children under 3 years.

AVERTISSEMENT:

DANGER D'ÉTOUFFEMENT - Pièces de petite taille.
Ne pas donner aux enfants de moins de 3 ans.

IMPORTANT STUFF FOR PARENTS & KIDS

Keep this important information for future reference. Read all warnings and instructions before you start to build and operate the model.

WARNING: CHOKING HAZARD - Small parts.
Not for Children under 3 years.

CAUTION:

- Keep hair, fingers, face, and clothing away from all moving parts.
- Do not attempt to launch anything other than the Rippin' Rocket car.
- Do not operate Turbo Boosters unless properly installed as shown.
- Do not obstruct Track with objects or any part of your body.
- You will need sharp scissors to cut the Track. Keep your hands and fingers away from the blades and especially the points of the blades. Adult help is recommended.
- Remove rechargeable batteries from model before charging; they must be charged only under adult supervision.
- Non-rechargeable batteries must not be recharged.
- Do not mix different types of batteries; do not mix alkaline, standard (carbon-zinc), or rechargeable (nickel-cadmium) batteries. Do not mix new and used batteries. Only batteries of the same or equivalent type recommended should be used.
- Insert batteries with correct polarity (+/-) as shown.
- Remove exhausted batteries from model; do not short-circuit supply terminals.
- Keep Components free of dust; do not immerse or use in water.
- Alkaline batteries C (LR14) are recommended.
- Do not dispose of batteries in a fire; they could leak or explode and cause injury.
- Remove all batteries if the toy will not be used for a long period of time.
- Power Option (not required): There is a plug on each Turbo Booster that accepts a plug-in AC to DC power adapter, 4.5 Volt DC, 1000 (or higher) mA, that can be used in place of the 3 batteries in each Turbo Booster. This optional adapter can be purchased separately from most electronics stores.
Be sure to use an adapter with the correct polarity. 
Outside of jack is negative (-), inside of jack is positive (+).

Keep these instructions in a handy location. They contain important safety information. Here are a few tips before you get started.

- Take your time to enjoy the building process. Take breaks often and ask a family member or friend to help. Most importantly, don't rush!
- Install batteries before building models.
- Your roller coaster model will perform best when placed on a smooth, flat surface.
- The RIPPIN' ROCKET Roller Coaster sets up in 7 feet by 3 feet. (213 cm x 91cm)
- If you need to move your model after it's built, two people can lift it carefully, making sure you are not unsnapping the connections.
- Product and colors may vary.

Our Warranty (US and Canada)

K'NEX Industries warrants the RIPPIN' ROCKET Set to be free of manufacturing defects in material and workmanship for a period of 90 days from the date of purchase. If, within the period of warranty, any part proves to have such defect, it will be replaced or repaired at our option at no charge.

K'NEX will not be responsible for damage and/or abuse to your RIPPIN' ROCKET Set, and such will not be covered by this warranty. Also, K'NEX will not be responsible for damage caused by defective or old batteries. Old or damaged batteries can leak and corrode metals.

K'NEX's sole and exclusive liability for defects in materials and workmanship shall be limited to repair or replacement by our Consumer Services Department, and K'NEX shall not be liable of incidental, consequential, contingent damages, except in those states that do not allow this exclusion or limitation.

This warranty gives you specific legal rights. You may have other rights which vary from state to state.

GETTING STARTED

How to Insert and Remove Batteries:

- Use a small Phillips head screwdriver to loosen the screw, then remove each battery door. Insert 3 fresh "C" (or LR14) batteries into each compartment with the correct polarity.
- Install all batteries in the Turbo Boosters before building.

- **Power Option (not required):** There is a plug on each Turbo Booster that accepts a plug-in AC to DC power adapter, 4.5 Volt DC, 1000 (or higher) mA, that can be used in place of the 3 batteries in each Turbo Booster. Adapter(s) can be purchased separately from most electronics stores.

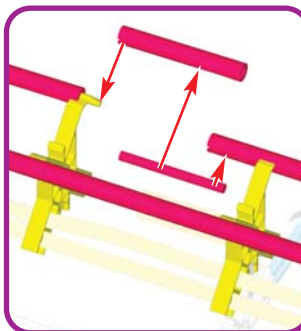

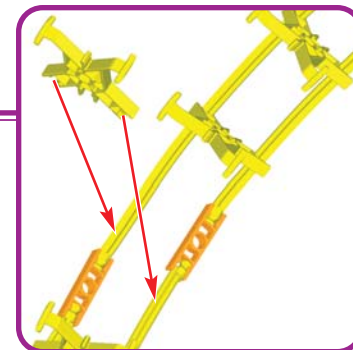

You can use 1 or 2 adapters. If you are using only 1 adapter, plug it into the Turbo Booster on the floor. The batteries are easier to replace in the Turbo Booster on the hill/side.

NOTE: When using a universal adapter with multiple power settings, use **ONLY** the 4.5v setting. Higher voltages **WILL** damage the Boosters.

- Pay special attention to the placement of the Track Connectors and the spacing between them.

- Car will go in the direction of the arrow on top of the Turbo Boosters.

- Your set contains 6 Splice pieces for connecting Track. If you cut the Track in the wrong place, you can use the Splice pieces to re-connect the Track.
- **TIP: DON'T THROW AWAY ANY EXTRA TRACK.** The best place to splice is on the big, downward hill or the straight, flat Track sections. Try to minimize the number of splices.

With high-performance features that rival the most extreme coasters in the world, your K'NEX RIPPIN' ROCKET Roller Coaster is built to thrill!

If your K'NEX Roller Coaster was life-sized and you were actually riding it, it would perform something like this:

Coaster Performance (to scale):

Top Speed: Over 120 mph (193 km/hour)

Maximum Acceleration: 7 G's

Height: 15 stories

Vertical Climb Angle: 90 Degrees

Vertical Drop: 12 stories

Super-G Loop Diameter: 3 stories

K'NEX BUILDING BASICS

Building with K'NEX

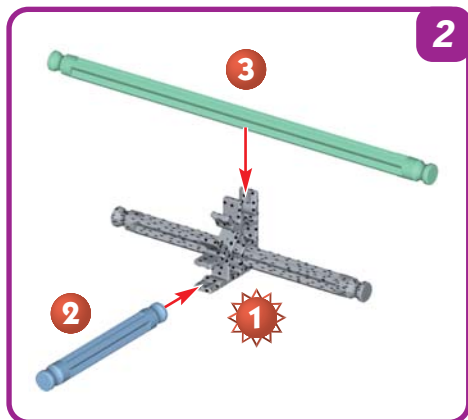

Hi! I'm your K'NEX Building Buddy. If you are new to the K'NEX Rod and Connector system, here are some tips that will have you building like a real K'NEXpert.

When you see me in the instructions, you'll want to pay close attention to the details being pointed out.

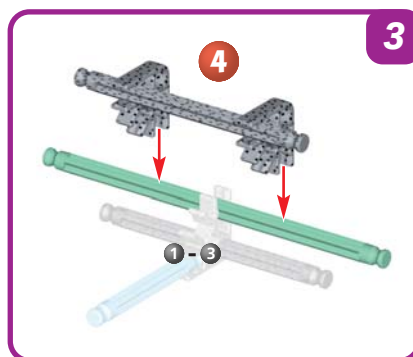

Ready, Set, Build

To begin your model, find the  and follow the numbers. Each piece has its own shape and color. Just look at the pictures, find the pieces in your set that match and then connect them together. Try to face your model in the same direction as the instructions while you build.

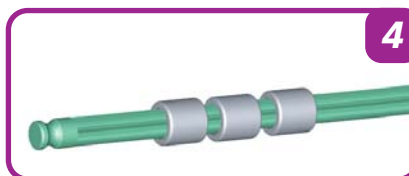

Movin' On

Faded colors show you this section is already built. You'll want to connect the new section to the place where the arrows are pointing. The new pieces you add and the place where they connect will be in full color.

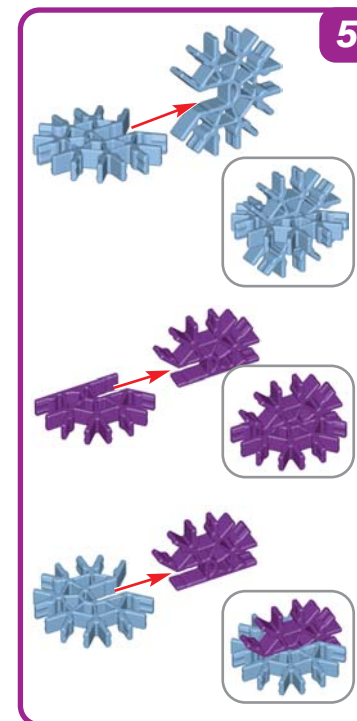

Spacers

There are places in your model where you need to add silver Spacers. Be sure to count them carefully.

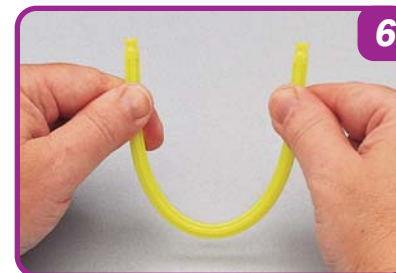

Connectors

There are blue and purple Connectors with special long slots. They slide together as you see in the pictures. Push these parts together until you hear a "click".

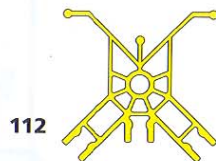

Flexi-rods

A Flexi-rod is a Rod that you can bend to make curves. It will be easier to attach to your model if you bend it back and forth first.

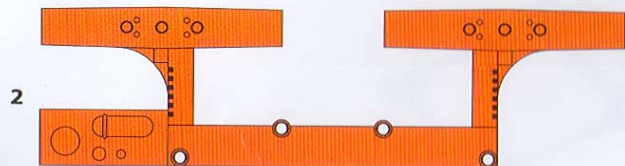

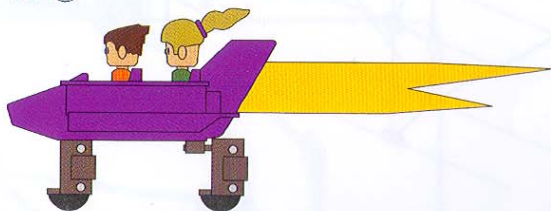

Parts Count

If anything is missing, check out the back cover of this instructions booklet for how to contact us.

TIPS & TROUBLESHOOTING

Keep this important information for future reference.

- Remove rechargeable batteries from model before charging; they must be charged only under adult supervision.
- Non-rechargeable batteries must not be recharged.
- Do not mix different types of batteries; do not mix alkaline, standard (carbon-zinc), or rechargeable (nickel-cadmium) batteries. Do not mix new and used batteries. Only batteries of the same or equivalent type recommended should be used.
- Insert batteries with correct polarity (+/-) as shown.
- Remove exhausted batteries from model; do not short-circuit supply terminals.
- Requires 6 "C" (or LR14) batteries.
- Do not dispose of batteries in a fire; they could leak or explode and cause injury.
- Remove all batteries if the toy will not be used for a long period of time.

Track:

- It's important to adjust the Track, especially in the loop area, before you finally cut the Track.
- If you cut the Track too short, you can use the Splice pieces to re-connect it. Use a minimum of splices.
- Be sure to apply the Track so that it is very smooth. If the ends of your Track are rough, trim a little off to make the ends a square, clean cut.

Car Performance:

- For best operation, you may want to clean the sides of the car periodically with a damp cloth.
- Car gets stuck at top.
 - A. If the Turbo Boosters are not running, check to see if the batteries are fresh and installed properly.
 - B. Is Track built properly at top of frame?
- Car does not go through loop.
 - A. Check to see if loop is built correctly.
 - B. Is Track fully attached and smooth on the Track Connector?
 - C. Is return curve and frame built properly?
 - D. Do you have the right number of Track Connectors and are they placed according to the instructions?
 - E. Are the support Connectors, that hold up the Track at specific spots, on the proper side of the Flexi-rods?

To disassemble, you can use a long green Rod to pop out the orange Connector as shown.

US

GB

Congratulations! You've built it! Now it's time to bring excitement and exhilaration to your new K'NEX RIPPIN' ROCKET Roller Coaster. Turn on the Turbo Boosters, buckle up, and hold on for the ride of your life!

F

Bravo ! Tu as fini. Le moment est venu d'animer ton nouveau K'NEX RIPPIN' ROCKET Roller Coaster. Allume les moteurs turbo, attache ta ceinture, et accroche-toi !

E

¡Felicitaciones! La haz construido. Ahora es tiempo de agregarle el toque de exaltación a tu nueva K'NEX RIPPIN' ROCKET Roller Coaster. ¡Enciende los motores con turbocompresor, ponte el cinturón de seguridad y sujétate para la mejor vuelta de tu vida!

D

Herzlichen Glückwunsch! Du hast es gebaut. Jetzt wird es Zeit, deinen tollen, neuen K'NEX RIPPIN' ROCKET Roller Coaster in Aktion zu sehen. Schalte die Booster ein, schnalle dich an und halte dich fest, denn gleich geht's los!

NL

Gefeliciteerd! Hij is klaar. Nu is het tijd voor spanning en opwindning met je nieuwe K'NEX RIPPIN' ROCKET Roller Coaster. Zet de motoren aan, doe je veiligheidsgordel om en houd je vast voor de rit van je leven!

US

GB

The Turbo Boosters are designed for use only in the direction shown. Do not let the car fall back into the Turbo Boosters because this may damage the car or tail.

F

Les Turbo Boosters (moteurs) sont conçus pour être utilisés uniquement dans la direction indiquée sur le schéma. Ne pas laisser la voiture retomber dans les Turbo Boosters, car cela risquerait d'endommager la voiture ou la queue.

E

Los Turbo Boosters (motores) están diseñados para ser usados sólo en la dirección que se muestra. No deje que el carrito caiga hacia atrás, contra los Turbo Boosters, porque esto puede estropear el carrito o la cola.

D

Die Turbo Boosters (Motoren) sind ausschließlich zur Anwendung in die angezeigte Richtung bestimmt. Das Auto auf keinen Fall in die Turbo Boosters zurückfallen lassen, da dies eine Beschädigung des Autos oder des Schwanzes zur Folge haben kann.

NL

De Turbo Boosters (motoren) zijn ontworpen voor uitsluitend gebruik in de aangeduide richting. Laat de wagen niet achteruit op de Turbo Boosters botsen want anders zou de wagen of de staart kunnen beschadigd worden.
