

Wire ring diy - to create mothers ring- with a pair of angle wings

Woven wire ring diy or beaded one? No, we don't introduce you a complicated item here! Just take you a few minutes to create mothers ring -a cute angle wings pattern for her holiday.

Messy were wrapping, exquisite wire weaving and multi-sized bead braiding, all of them are popular wire ring diy methods, but takes plenty of time to try and complete, particularly for a novice, a much longer and tougher journey to follow. Why not choose to create mothers ring in a much plain way, with a brief design which is straight forward to show your mind.

Materials and tools:

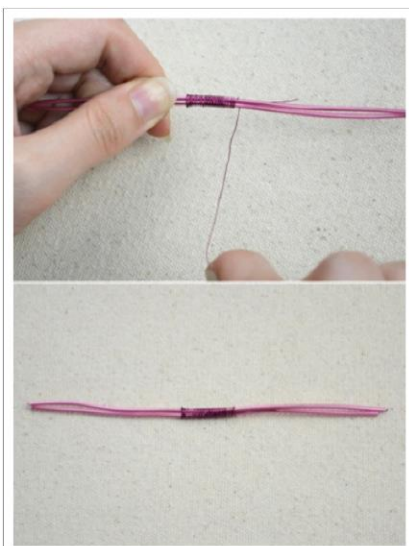

- 1.5mm purple [aluminum wire](#)
- 0.3mm purple [copper wire](#)
- Marker with round shank
- Round nose plier
- Wire cutter

Instructions:

Step 1: make coiling onto alum wire

1st, snip two pieces of alum wire, measuring about 15cm;

2nd, snip another piece of copper wire and do coiling as much as you desire.

Step 2: shape wire ring's shank

1st, push coiling to the center of double alum wires;

2nd, wrap wires around marker, forming a round loop.

Step 3: finish the wire ring diy

1st, at each side, make one wire longer and the other shorter;
2nd, with round nose plier to make wing patterns.

Tada, the wire ring diy is done successfully!

The wings represent Angles; with angle wings ring, mom is always under holy protection, which is your good wish and why you create mothers ring in this pattern for her.
