

Unique diy crafts-bracelet and ring connected jewelry

Today's post is about one of the recently popular unique diy crafts-the "slave bracelet", i.e. a bracelet and ring connected jewelry. Just have a look and design your own piece by chains and jumprings.

While browsing the internet for newly trendy jewelry, we may come across the "slave bracelet" actually frequently. However, this phrase does not mean to offend or abuse anybody as much as judging literally, typically, it is a bracelet and ring connected jewelry. And in today's post I will rightly show you such piece among the unique diy crafts.

Supplies needed in the unique diy crafts:

- [Chains](#) (thin & thick)
- [Jumpring](#)
- Lobster Claw Clasp
- Flat Nose Plier
- Side Cutting Plier

How to make the bracelet and ring connected jewelry?

Step1: prepare the chain part

1. Cut out a short segment thin chain that will fit around your middle finger;
2. Then, cut another 2 strands of thin chain for the connected branches;
3. Wrap the thick chain around your individual wrist and cut out the segment.

Step2: assemble the bracelet

1. Open one small jumpring and connect the starting and ending links of shortest part for wearing on your finger;
2. Then the two similar links of the connected chains;

3. Crab the thick chain and find the middle point. Now, from the middle, go out about 1cm distance on each side. Attach the two ending links of connected branches to the locations you've found, by using the jumpings.

Step3: add on your clasp

Attach the lobster claw clasp and a larger jumping on two ends of the bracelet.

Voila! You gained yourself the bracelet and ring connected jewelry!

It seems so wonderful over your back of hand, right? Due to it may make us a bit of indisposed feelings, I'd rather to name it a bracelet and ring connected jewelry rather than the so-called slave bracelet. Just move and act such unique diy crafts for a stunning chain harness for you hand.
