Step 1: prepare wire and add beads

Snip a piece of copper wire long enough for next steps;

Add an abacus bead to center and slide seed bead, glass pearls according to your design;

Remember to twist wire several times after a bead slid onto, which makes every bead "floating".

First, continue beading and twisting with much toing and froing, and shape the wire ornament as you like;

When the work is done, cut off the excess wire and tuck the ends into beads to avoid any possibility of poking out.
