

## Wooden bead bracelet- one kind of antique bracelet patterns

In our wooden bead bracelet tutorial, we are going to show you a kind of different bracelet patterns in antique and Chinese traditional flavor.

I keep thinking of making some fancy and brilliant bracelet jewelry with wood beads and colorful threads, because in my view, the two things are both featured by the innate grace and gentle nature. So the wooden bead bracelet with tassel is just an excellent bracelet pattern for some of you who very need it as I do.

### Materials and tools:

- 8mm [wooden beads](#)
- 1mm nylon threads
- 0.5mm [Elastic wire](#)
- Crimp bead
- Needle
- Scissors
- Cardboard 5\*5cm
- [Flat nose plier](#)

### Instructions:

#### Step 1: string wooden beads

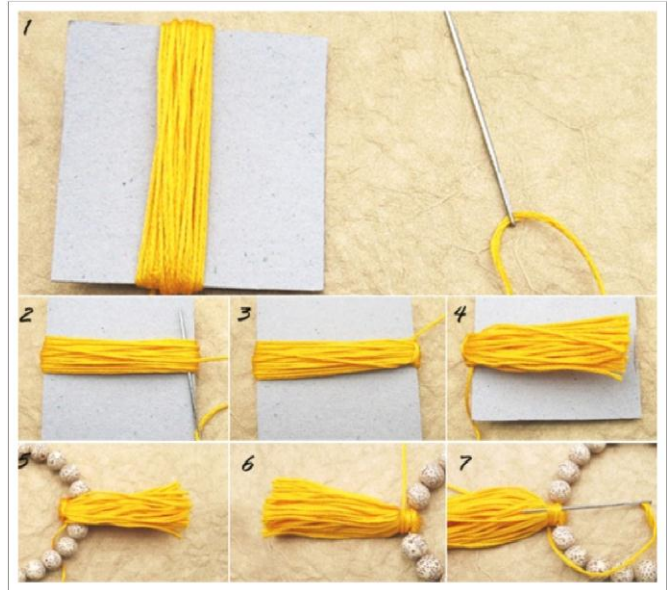

1<sup>st</sup>, snip 18cm length of elastic wire (which depends on your wrist size);

2<sup>nd</sup>, string beads onto wire and secure wire ends with a crimp bead.

### Step 2: make pretty tassel

1<sup>st</sup>, wrap threads around cardboard whatever times you like and then thread the end thru your needle with leaving 20cm tail;  
2<sup>nd</sup>, thread needle beneath the threads and wrap tail around them 2 or 3 times;  
3<sup>rd</sup>, along cardboard side cut the threads into 2 halves;  
4<sup>th</sup>, replace cardboard with wooden bead string;  
5<sup>th</sup>, wrap tail around the whole tassel several times;  
6<sup>th</sup>, at last wrap thread needle thru the wraps and tighten tail;

### Step 3: complete this bracelet pattern

Cut off excess end to make the tail as long as the rest threads.

Tada! The tassel wooden bead bracelet pattern is finished! I suggest you for creating a stack of these beautiful wooden bead bracelets. Once wearing on wrist, they may produce multi-layered cool effect.
